

S/N	STARFUND Website Information	Description
1	Name of the Course	ESG Data Management and Reporting for SMEs
2	Course Overview	<p>Data is key, to manage ESG within an organisation. For an organisation to execute a good ESG strategy, the organisation must include a good data management strategy.</p> <p>Once a company gets data management right, they can determine access to capital, attractiveness for investors and also engage internal and external stakeholders more effectively.</p> <p>Corporate sustainability disclosures represent one of the largest sources of ESG data globally, and there is a great scope to harness technology to enhance such disclosures and comparability of data to support financing decisions in a company. Technology is an important way to make sure that this data is reported quickly, correctly, and efficiently in a world where the disclosure landscape is changing rapidly.</p> <p>This course will introduce participants to the process of ESG data management and stakeholder disclosure. They can:</p> <ul style="list-style-type: none"> • Learn and apply how to create a baseline ESG disclosure • Have a clear understanding of the recommended steps to further develop their company's competency in ESG data management • Understand how to safeguard the business into the future
